The Center for Applied Isotope Studies (CAIS) is a core research and service unit of the University of Georgia, established in 1968, that designs, develops, and applies innovative analytical technologies and methods for AMS radiocarbon dating & stable isotope analyses. CAIS has more than 45 years of excellence in radiocarbon dating and development. We are also among the largest stable isotope laboratories in the country. Recently, CAIS expanded its analytical services to include Sr & Pb isotope ratio analyses using its new HRMC-ICP-MS. The tri-fold mission of CAIS is education, research and service. To this end, CAIS scientists work with researchers to determine the best analyses for their interests and questions.

Interactive workshop, Q&A session and clinic with the Editors of the *Journal of Human Evolution*

Wednesday, April 13th, from 4:00 PM to 5:30 PM

Location: Room A705 at the Marriott Marquis Atlanta

We are inviting PhD students, post-docs and early career researchers to meet the Editors of the *Journal of Human Evolution* and receive advices on how to get published in the journal.

The workshop will take place on Wednesday April 13th at 4:00 PM. in room A705 of the Marriott Marquis Atlanta , coinciding with the Annual AAPA Meeting.

Attendees who are currently working on a manuscript are welcome to bring it along. The Editors will be happy to privately go over it at the end of the session and provide some feedback.

Coffee, tea and pastries will be provided.
We hope to see you at the workshop!

*Please email Paul-André Genest, the *Journal of Human Evolution*'s publisher at: p.genest@elsevier.com if you have any questions.

UNIVERSITY PRESS OF FLORIDA

ANNOUNCING A NEW JOURNAL

FLORIDA

Bioarchaeology International will provide a new outlet for rigorous peer-reviewed publication in the growing field of bioarchaeology. The quarterly journal will publish original research articles, brief reports, and invited review essays that are related to the study of archaeological human remains and mortuary sites.

SUBMISSIONS from varying scales of analysis (e.g., regional, community, site/sample, individual, structural, cellular or molecular) that focus on theoretical and methodological issues in the field are encouraged.

University Press of Florida is actively seeking submissions for the following series:

BIOARCHAEOLOGICAL INTERPRETATIONS OF THE HUMAN PAST: LOCAL, REGIONAL, AND GLOBAL PERSPECTIVES

EDITED BY CLARK SPENCER LARSEN

Focusing on bioarchaeology, authored and edited volumes highlight central issues, such as biocultural responses to stress, health, lifestyle and behavioral adaptation, biomechanical function and adaptive shifts in human history, dietary reconstruction and foodways, biodistance and population history, warfare and conflict, demography, social inequality, and environmental impacts on population. Collectively, authors and editors emphasize integrative, interdisciplinary analysis of the links between biology and culture in past societies and the range of cultural, social, and economic conditions and circumstances that have shaped the human experience.

Letters of inquiry should be addressed to director **Meredith Morris-Babb** at MB@upf.com.

The University of Bradford has been teaching archaeological sciences since 1973, being the first institution in the UK to offer this subject at both undergraduate and Master's level. We have been a world-leading centre for palaeopathology since 1980, when Dr Keith Manchester joined the department. We have amassed a collection of over 4,000 human skeletal remains from archaeological contexts from the Neolithic to the 19th century, which are used throughout our teaching and research. We have recently moved to the £1.25m Integrated Learning Centre for Life Sciences, with state of the art teaching and research laboratories, for anatomy and physiology, including dedicated human

osteology, paleopathology and radiography laboratories. We also have internationally renowned analytical facilities, including laboratories for the analysis of stable light isotopes.

Come and talk to us about the following programmes:

- Doctoral research
- MSc Human Osteology and Palaeopathology
- MSc Forensic Archaeology and • Crime Scene Investigation
- MSc Archaeological Sciences

Archaeological Sciences at Bradford was in the top 10 in the UK for archaeology in the 2014 Research Excellence Framework (REF) which assesses the quality of research conducted in all UK Universities. We were ranked 3rd in the UK for research impact.
